PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer with 10 years of experience building scalable SaaS, EdTech, and carrier-grade telecom platforms with Laravel, Symfony, Vue.js, and React.js. Led teams of up to six developers, shipped 10+ SaaS products for international clients, and built AI-powered automation with the OpenAI API. Experienced in distributed, async collaboration across time zones, with full working-hour overlap with Europe and the Middle East.

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript (ES6+), Python, SQL, HTML5, CSS3
- **Frameworks:** Laravel, Symfony, Vue.js, React.js, Node.js, Express.js, Tailwind CSS
- **Databases & Caching:** MySQL, PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** AWS, Docker, Nginx, Git, GitHub Actions, Jenkins, CI/CD
- **Architecture:** REST APIs, WebSockets, Microservices, MVC, System Design, Secure Coding
- **Testing & Quality:** PHPUnit, Pest, Automated Testing, Code Review
- **AI & Developer Tools:** Claude Code, GitHub Copilot, Cursor AI, OpenAI Codex, OpenAI API, Prompt Engineering
- **Remote Collaboration:** Jira, Slack, async communication, technical documentation

PROFESSIONAL EXPERIENCE

Senior Full-Stack Engineer | Ezelink – Dubai, UAE | Jan 2025 – Present

- Core developer on PIAP (Public Internet Access Provider), a carrier-grade public Wi-Fi platform for a national telecom operator, building the user login portal and core server with Laravel, Symfony, and Vue.js. Also contribute to EZELB (multi-WAN load balancing).
- Building PIAP v2.0's geo-redundant, active-active multi-site architecture: sensor-led failover, application-level cross-site sync with no stretched database, and a single active admin site with epoch-based config versioning.
- Implement SMS OTP login over SMPP with idempotent cross-site retry, plus sensor discovery, registration, and keepalive protocols with per-site health tracking. Expose a REST Automation API and integrate with operator SIEM, SNMP fault management, and sFTP compliance log delivery.
- Built the frontend of EZENMS, Ezelink's network monitoring system, integrating its Java backend APIs for device health, metrics, and alerting dashboards. Delivered UI enhancements across several other Ezelink products.
- Use Claude Code, GitHub Copilot, Cursor AI, and OpenAI Codex across coding, debugging, testing, and documentation, substantially accelerating feature delivery.

Lead Full-Stack Developer | Pace International School – Sharjah, UAE | Oct 2022 – Nov 2024

- Led development of an EdTech platform serving 5,000+ active users, improving application performance by 25%.
- Built AI-powered admin automation with the OpenAI API, reducing content generation time by 40%.
- Delivered WebSocket real-time collaboration, analytics dashboards, SQL optimization, and backend automation.
- Mentored developers, ran code reviews, and set engineering best practices in an Agile team.

Lead Laravel Developer | Interactive Tech Solutions – Lahore, Pakistan | Apr 2021 – Sep 2022

- Led a team of six developers delivering 10+ SaaS applications for international clients across multiple time zones.
- Standardized Git workflows, CI/CD pipelines, and deployment practices across all projects.
- Designed scalable Laravel architectures, REST APIs, and reusable backend components.

PHP Laravel Developer | Jobesk – Lahore, Pakistan | Jun 2020 – Apr 2021

- Built backend systems, RESTful APIs, authentication modules, and reusable Laravel services.
- Improved MySQL performance through query optimization, indexing, and tuning.

Laravel Developer | Histone Solutions – Rawalpindi, Pakistan | Nov 2018 – Apr 2020

- Built backend services processing millions of Amazon marketplace records for SellerLegend, an international SaaS product.
- Optimized ETL pipelines, third-party API integrations, and performance for large-scale marketplace data.

PHP Web Developer | Karigar Web Solutions – Sialkot, Pakistan | Nov 2016 – Jun 2018

- Developed 25+ custom XenForo plugins and extensions in PHP.
- Built responsive web interfaces and improved site performance across client projects.

EDUCATION

BS Software Engineering | University of Gujrat, Pakistan | 2012 – 2016

GPA 3.45 / 4.00 · WES-evaluated (US & Canada equivalent)
